

# AVDEY AXONOV

avdaxonov@gmail.com | (980) 337-8268 | Charlotte, NC | [github.com/Avdey7](https://github.com/Avdey7) | [linkedin.com/in/avdey-axonov](https://linkedin.com/in/avdey-axonov)

Computer Science graduate (May 2026, GPA: 3.88) with hands-on experience building full-stack web applications using **React, TypeScript, JavaScript, and SQL**. Comfortable across the stack — from designing data schemas and REST APIs to building responsive front-end interfaces. Background in cybersecurity adds a practical understanding of **secure coding practices**, input validation, and access control that translates directly to production-quality software development.

---

## EDUCATION

**University of North Carolina at Charlotte**

May 2026 | GPA: 3.88

B.S. Computer Science, Concentration in Cybersecurity

**Relevant Coursework:** Software Engineering, Database Systems, Network Security, Web-Based Application Development, Digital Forensics

---

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, Java, SQL, Bash

**Front-End & Frameworks:** React, HTML/CSS, REST API integration, component-based UI development

**Back-End & Databases:** Express.js, Node.js, MongoDB, JWT authentication, parameterized queries, data schema design

**Tools & Practices:** Git/GitHub, Linux, Agile workflows, unit testing, input validation, secure coding practices

---

## PROJECTS

**Full-Stack Secure Web Application** | ITIS 4166 — UNC Charlotte

2024–2025

- Built a **TypeScript/Express.js/MongoDB** application with JWT authentication, role-based access control, and parameterized queries — designed with data integrity as a first-class concern from the start
- Structured data schema to support efficient querying and extensibility; wrote and validated test cases across all API endpoints to ensure consistent behavior
- Applied **React** on the front end to build a responsive, component-driven interface with clean separation of concerns between UI and business logic

**TuneStore Web Application Penetration Test** | ITIS 4221/5221 — UNC Charlotte

2024–2025

- Identified and documented vulnerabilities including **SQL injection, XSS, CSRF, and broken access control** — developed a hands-on understanding of how insecure coding patterns manifest in real applications
- Produced structured technical reports for each phase with reproduction steps and remediation recommendations — directly applicable to Agile sprint documentation and engineering communication

**Web Application Vulnerability Assessment** | ITIS 4221/5221 — UNC Charlotte

2024

- Conducted structured assessments across enterprise-simulated environments; analyzed application behavior, traced data flows, and documented findings with actionable remediation steps

**Digital Forensics Investigations** | ITIS 4250 — UNC Charlotte

2024–2025

- Extracted and analyzed data across file systems, registry hives, and network logs; synthesized findings into structured SANS-format reports demonstrating strong technical writing and documentation skills

**DoD Cyber Sentinel Skills Challenge** | Correlation One (DoD-Sponsored)

June 2025

- Competed in a DoD-sponsored CTF covering Networking, Web Security, OSINT, and Forensics — applied problem-solving and debugging skills under time pressure across unfamiliar technical environments

---

## EXPERIENCE

**Kids' Camp Leader** | Church of New Hope

Aug 2020 – Present

- Coordinated multi-day events, managed volunteer teams, and communicated updates to stakeholders across planning and execution phases

**Audio Systems Engineer** | Church of New Hope

Jan 2019 – Nov 2020

- Managed live technical systems for large-scale events; diagnosed and resolved complex issues under time pressure
